No mundo do poker, é comum escutar os termos "pot odds" e "odds", em poker basico geral. Mas o que realmente eles significam e como eles se aplicam ao Texas Hold'em? Neste artigo, vamos abordar exatamente isso, além de dar uma olhada em poker basico um exemplo de mão no No-Limit Hold'em.

O que significa 3 para 1 em poker basico poker?

Quando se fala em

3 para 1

, estamos realmente nos referindo a

Preflop play in Pot Limit Omaha can be daunting.

There are 270,725 hands to wade

through, and the all-in equities of 5 said hands run very closely together.

AAKK is

arguably the best starting hand in PLO. Let's take a look at its 5 equity against

T842:

This garbage hand musters over 34% equity against an absolute monster.

Edges

get smaller as equities run closer together, 5 which is why PLO feels more gamble-y than NLH. But there are still tactics you can use to maximise your 5 edge preflop and set yourself up for success postflop.

We'll talk about two preflop tactics in this article:

'pushing' and 'pulling'. 5 These tactics can help give structure to the often-confusing world of preflop PLO.

Let's get straight to it.

Pushing vs pulling in 5 Pot Limit

Omaha

'Pushing' and 'pulling' describe the two approaches we can take with a hand preflop. More specifically:

Pushing: The act of fast-playing to reduce the number of players that will see a flop

Pulling: The act of calling to induce other 5 players to call as well

If you're a No Limit Hold'em player, you've probably used similar tactics.

Consider:

All the times you've 5 attempted to 'push' multiple opponents out of the pot preflop by squeezing with a strong-but-vulnerable hand like AQo

The many times 5 you've

limped behind with a small pair to 'pull' more opponents into the pot for when you

spike a set

That 5 said, figuring out which hands to pull and push with is more complicated in PLO than NLH. Let's dive into 5 specifics.

Which hands should you push with?

When pushing, our main goal is to minimise the number of players in the hand.

5 Therefore, we should choose to push with hands that play well in large, heads-up pots.

Hands that benefit from low stack-to-pot 5 ratios—which allows us to get all-in on earlier streets—function well as pushes. Semi-connected, double-suited Broadway pair holdings—think KK78—and double-paired, double-suited 5 middling hands—think TT99—are candidates that do well when the SPR is low.

Multi-component hands

function well as pushes as well. (If 5 you're unfamiliar with preflop components in PLO, read this article.). Hands with multiple components will connect with the flop across 5 a variety of textures, thus allowing us to exert more pressure on our opponent(s).

Here

are five examples of hands you 5 should usually look to push with:

AA45 single-suited

JJT9 double-suited 9988 double-suited ATTx double-suited T987 double-suited

Which hands

should you pull with?

Our 5 goal when pulling is to incentivise calls from the players

behind. The resulting multiway pot means we should look to 5 pull with hands that can make the nuts relatively easy.

A single-suited, connected hand like AT98 is a prime

example of 5 a pulling hand as it can hit the nut flush and multiple nut straights. If we make our hand, we 5 may win a big pot against a player with the second or third nuts, who came in behind us with 5 a weak range.

Pulling hands realise their equity in a rough

way—they hit a narrow range of board textures—and thus perform 5 best when the SPR is high. It's typically best to avoid committing to the pot with hands that realise their 5 equity in a rough way.

Here are five examples of hands that function well as pulls:

JT98 unsuited QQ98 single-suited AJ89 single-suited 5 789T unsuited AK98 double-suited

But it isn't always that simple

Some hands are exceptions to the pushing/pulling categorisation method used above.

Very strong 5 hands that are connected,

double-suited and A-high—think AKQJ or AKT7—may seem like pulling hands, but they are simply too strong 5 to play as a call. Pushing with such hands is more effective, as it will allow you to extract value 5 and thin the field, which means your great equity is more likely to hold.

Similarly, there are instances where we should 5 pull with hands

that we would usually push with. For instance, using a push hand as a pull is a 5 good adjustment if there have been multiple callers and we don't have enough fold-equity to justify pushing given the strength 5 of our hand.

Don't get carried away with pushing people around

Be careful not to go overboard when it comes to pushing 5 and pulling. Just

because a hand seems like a push doesn't mean you should raise it—or even play it—every

time. 5 For example:

\$1/\$2 PLO Cash Game. 100BB Effective Stacks

Hero is dealt J876

in the CO

Tight player raises to R\$6 from UTG. 5 5 folds. Hero...

Despite boasting multiple

features of a typical pushing hand, this hand should be folded. Since we are up against 5 a strong UTG opening range, pushing with a relatively marginal hand like this one would be far too loose.

J876 will 5 find itself in a lot of tough spots postflop, and will

often lose big pots at showdown when it hits 5 good-but-second-best hands.

Keep this idea

in mind when categorising your hands. Don't just push or pull for the sake of it 5 –

think about the ranges of your opponents and how your exact hand will shape up against them before you 5 make your decision.

Final thoughts on pushing & pulling

Following the

core principles outlined above is a good starting point, but always 5 remember that your ranges should be fluid and exploitative adjustments should be made depending on the tendencies of your opponents.

Good 5 luck at the tables!

P.S.: My next PLO article is

going to involve analysing some interesting high-stakes hands – if you've 5 got any

requests for fun hands that you want analysed, tweet me at @GeorgeCMathias or post them in the comments 5 section.
